Re: Coordinated Pre-Enforcement Conference
Enforcement No. 7308-HAZ (RCRA) &
No. 7386 (NPDES)

Dear Ms. Yang and Mr. Pavlou:

With regard to the Company's undertaking to submit a wastewater treatment facility study, please be advised that management has decided to move the fabricated metal department to another location. As a result, the Company will discontinue operation of its industrial wastewater treatment plant at the Clinton facility and all discharges from the facility's Outfall 003 will cease.

Selected parts of the WWTP will be moved to the new location and will be the subject of a new construction and operating permit application.

Please find enclosed a proposal for a soil sampling plan submitted by STS Consultants, Ltd., at our request.

Very truly yours,

Stephen H. Kaprelian
